ECO-DRIP

Cotton Farming

WORKSHEET

Please provide a synopsis of the overall conservation water management strategy implemented in your 2017 cotton operation. Please include tillage trips, weed control practices, cotton varieties and date of planting. You may attach additional documents, if necessary.

Please provide a synopsis of how the pre-water was handled. Please include how you determined to start pre-water and your overall pre-water philosophy. Attach additional documents, if necessary.

WORKSHEET

Please provide a synopsis of how the in-season water handled. Please include how you determined to start/stop irrigating and any water conservation strategies used. Attach additional documents, if necessary.

Please describe why conservation farming is important to you and your operation. Please include how you believe it enhances your profitability.
